

# The HTA Database Canadian Search Interface

Your go-to source for Canadian  
and international health  
technology assessments

<http://www.crd.york.ac.uk/PanHTA>

The Health Technology Assessment (HTA) Database, funded by the UK's National Institute for Health Research, brings together details of health technology assessments from around the world.

Now HTA producers from Ontario, Quebec, Alberta, and the pan-Canadian agency CADTH, have partnered with the NIHR to create a common repository and search tool for Canadian HTA reports within the international HTA Database.

This database is a significant new tool to support evidence-based decision making across Canada.

The database contains HTAs from:

- 52 members of the International Network of Agencies for Health Technology Assessment
- 20 other HTA organizations around the world
- More than 13 Canadian HTA producers, with plans for more Canadian organizations to participate in the next two years

Are you a Canadian HTA producer interested in contributing to the database? Contact us at [CdnHTA@cadth.ca](mailto:CdnHTA@cadth.ca) to learn how to get involved.

For additional resources, visit [www.CdnHTA.ca](http://www.CdnHTA.ca)

## The HTA Database Canadian search interface lets you:

- Automatically limit search results to HTAs produced in Canada
- Search internationally if you can't find a Canadian HTA on your topic
- Search in English or French
- Limit your search by province
- Easily organize your search by:
  - + Topic (using medical subject headings)
  - + Title
  - + Author
  - + Agency (CADTH, NICE, INESSS, etc.)
